

SMART MANAGED IT SOLUTIONS

TO TRANSFORM YOUR BUSINESS

Skilled staff and industry expertise put to work for your company.

Our people are our most important investment and service excellence is our most important goal. End to End Networks™ solution engineers and technical support staff are highly trained professionals who have both the expertise and certifications to support our clients. Our dedication to on-going mentoring and training ensures our clients always work with the best and our 7x24 Live Voice Service Desk guarantees help is always there when you need it.

We partner with leaders in technology to keep our clients strategic.

End to End Networks understands how rapidly technology evolves. By partnering with industry leaders such as Cisco, Juniper & Microsoft, we ensure that our solutions are proven and reliable. Our clients know that they are getting a best-in-class solution while protecting their IT investments, which helps them to achieve a competitive advantage in their market space.

Why choose End to End Networks?

Our understanding of how to align business needs with IT strategies along with superior customer service makes End to End Networks the Managed Service Provider of choice for those companies looking to enable their business.

OUR COMPANY

End to End Networks Inc. is an established provider of Managed Network & Security Services across North America. Since 1993, we have maintained a reputation for service innovation. When combined with our comprehensive portfolio offerings, we deliver strategic technology solutions that fit the unique business needs of our clients.

Through our core values of Quality, Integrity and Balance, we work to build connections with our people, partners, clients, and the community. Making these connections allows us to share our industry expertise, build loyalty amongst our client base, and establish trust. End to End Networks strives to understand your business needs, exceed expectations and to ultimately share in positive results.

Our goal is to leverage current technologies to provide a positive business impact. Each of End to End Networks™ service offerings is aligned to a specialized area of IT management and is constantly compared against industry developments to ensure superior leading edge service. As a trusted advisor, End to End Networks will show you how technology can become a strategic investment for your business.

Service Innovation

An EndWatch™ Solution

Quality Service...Anytime...Anywhere

Businesses can take advantage of an extensive IT knowledgebase and operational best practices so there is no need to worry about IT staff turn-over, re-training cycles or a constant change of IT strategic visions.

OUR EXPERTISE

End to End Networks Inc. offers a wide range of consulting and professional services. These services are aimed at developing smart IT solutions that align with our clients' needs and leverage new and existing voice and data architectures. Our certified Solution Engineers and Network Specialists utilize current industry standards while planning, executing, and managing projects.

Developing and managing an internal Service Desk can be quite challenging as it requires continuous maintenance of skill sets, the right resource mix to accommodate high turnover, and the assurance of best practices being followed. End to End Networks eliminates these strains by extending its 7x24x365 National Support Centre to companies who need additional coverage, industry expertise, and high quality standards.

"We are the Managed Network & Security Service provider of choice for companies looking to enable their business. We deliver effective, high quality IT solutions that bridge the gap between desired business outcomes and the expectations that technology promises."

-David Burnett, CEO, End to End Networks Inc.

OUR SERVICE PORTFOLIO

Our EndWatch™ portfolio encompasses specialized IT management services that are aligned with industry best practices. The EndWatch™ portfolio includes:

NetWatch™ has been developed to support foundation networks which include both private and public data infrastructures. Clients can be confident that their network core is running optimally and minimizes business downtime.

SecureWatch™ is designed to accommodate business priorities pertaining to compliance regulations and consumer privacy laws (i.e. PCI, PIPEDA, and Sarbanes-Oxley). It supports Intrusion Detection & Prevention technologies as well as secure corporate access solutions.

SystemWatch™ is focused on measuring and improving service levels for servers by pro-actively monitoring key performance indicators of those devices and critical applications. An optional on-site service is also available to ensure the on-going maintenance of server environments.

Unified Communications management supports integrated voice and data infrastructures by ensuring that these critical business operations are always functional.

OUR Award Winning Portal, eView™

eView is a sophisticated web-based client management portal that provides companies with a single point of entry to crucial information about their corporate IT assets. Companies can manage IT costs by using eView as a central repository to track IT assets, data telecommunications information, and manufacturer hardware and software maintenance contracts.
