# Keep the heart of your network beating.

## CHECKLIST - How to select an installer.

**At the heart of any well designed network is the foundation:** the network cabling infrastructure. Yet it's often the last thing organizations consider when making technology acquisition decisions.

Selecting the correct partner is critical, not only for the initial installation, but also for future moves, additions and changes. Here are some questions to ask before committing to an installer:

- ✓ *How long have you been in business?*
- ✓ *How much insurance coverage do you have?*  
*Can we see proof?*
- ✓ *How many technicians are on staff?*  
*How many are full time employees, and how many are subcontractors?*
- ✓ *Who were they trained by?*
- ✓ *What certifications does your company hold?*
- ✓ *What certifications do your technicians hold?*
- ✓ *How does your company test and validate your work?*
- ✓ *What testers do you own?*
- ✓ *Can we question your references and visit your reference site(s).*
- ✓ *What documentation do you provide when the installation is complete?*
- ✓ *What other services can you provide that will help us maintain our network operations?*

## OUR HISTORY

**End to End® is a Network Managed Services company founded in 1993**, specializing in the design, building and management of corporate networks. Our clients are domestic and multi-national organizations. We're committed to quality service and client satisfaction. We provide complete turn-key solutions: cost-effective and flexible network designs, successful network implementation, and reliable network support and management.

End to End has focused on developing expert core technology groups who excel at the management of global data network infrastructures and communications. We provide design engineering and consulting services, as well as complete management services including monitoring, maintenance and reporting for these networks under comprehensive service contracts.

## THE NETWORK CABLING DIVISION

**Our cabling division was founded in 2000 offering our clients a true one-stop partner.** There's no finger pointing, no blaming network problems on the cable installers. Through our National Support Centre (NSC) we monitor, trouble shoot and provide diagnostics around the clock - 7 days a week, 24 hours a day, 365 days a year – making sure that you receive the network performance you need.

## CABLING SERVICES

**Copper cabling for Category 5e, 6 and 6a Augmented**

**10 Gig UTP cabling**

**Cabling for data, voice and video applications**

**Fibre cabling – multimode and single mode**

**Cable audits**

**VOIP cable validation, testing and certification**

**Wireless surveys**

**Wireless access point configuration and installation**

**Cable re-certification**

**Wiring closet and computer room clean ups**

**Trouble-shooting and problem resolution**

**Project management**

### **Neatness and attention to detail counts**

Ensure your cabling is accessible, easily identifiable to improve trouble-shooting and tracing capabilities.

*Do any of these pictures look familiar?*

*If Yes – you will have problems, if you're not experiencing them already.*
